

Welcome back! Day 3!!

Grab some breakfast!

If you have lingering questions, please write them on sticky notes & add them to the sticky note wall so that we can start answering them around 9:30 am.

On a 1-9 rubber duck scale, how are things going today?

At this workshop

Monday	Tuesday	Wednesday	Thursday
Introduction to the Allen Institute & Python	Using Python in Neuroscience	Using Python with Allen Institute Data	Implementation & Next Steps
Introduce use cases for coding, learn basics of python, and unpack coding pedagogy	Introduction to common packages used and work through an existing lesson; unpack coding pedagogy	Dive deeper into using Python to analyze Allen Institute data through multiple existing lessons; unpack coding pedagogy	Learn more about how to do this at your institution and plan next steps

Desired outcomes

- 1 establish a growth mindset with regard to computer programming
- 2 provide resources so that you could teach an existing lesson that incorporates Python
- 3 start you on the path toward eventually designing your own lessons that incorporate Python

Reflection Questions

- What was the most useful thing you learned yesterday?
- What was the most surprising thing you learned yesterday?
- What are you most confused about from yesterday?
- How is coding pedagogy similar or different vs. pedagogical strategies you already use in your classes or labs?
- Other questions?

Today's agenda

Breakfast + Questions

9:00 AM - 10:00 AM

Visual Coding Lesson (Saskia)

10:00 AM - 12:00 PM

Lunch

12:00 PM - 1:00 PM

2:30 PM - 3:00 PM

Afternoon Break

3:00 PM - 3:30 PM

Epilepsy Case Study (Theresa)

3:30 PM - 4:30 PM

End of Day Reflections (Rachel)

4:30 PM - 5:00 PM

Small group discussion:

Student Perspective

- How was it to learn about new data + analysis while learning new code?

Instructor Perspective

- What strategies did you notice the facilitators used?
- How would you implement or modify (to implement) the strategies used when teaching your own students?
- Consider structure: how would you structure this for your classes: what would you make pre-class, in-class, post-class?
